SURVIVAL

hypothermia blankets

COVER ↻ PROTECT ↻ SURVIVE

The **Igloo Hypothermia Blanket** helps to preserve lives during initial medical care. The Igloo blanket combines state-of-the-art materials and technology to **regulate temperature swiftly and effectively** during emergency situations, playing a critical role in initial medical assessment and interventions.

Designed for emergency situations, The Igloo Blanket combines **cutting-edge technology** with practical features to quickly stabilise temperature and maintain optimal thermal retention.

The Igloo Blanket is the ultimate choice for the Military and Emergency Services including dedicated teams trained to save lives in rugged terrain. Available in **Emergency Orange** and **Coyote Brown** for military use.

Life-saving heat to the core

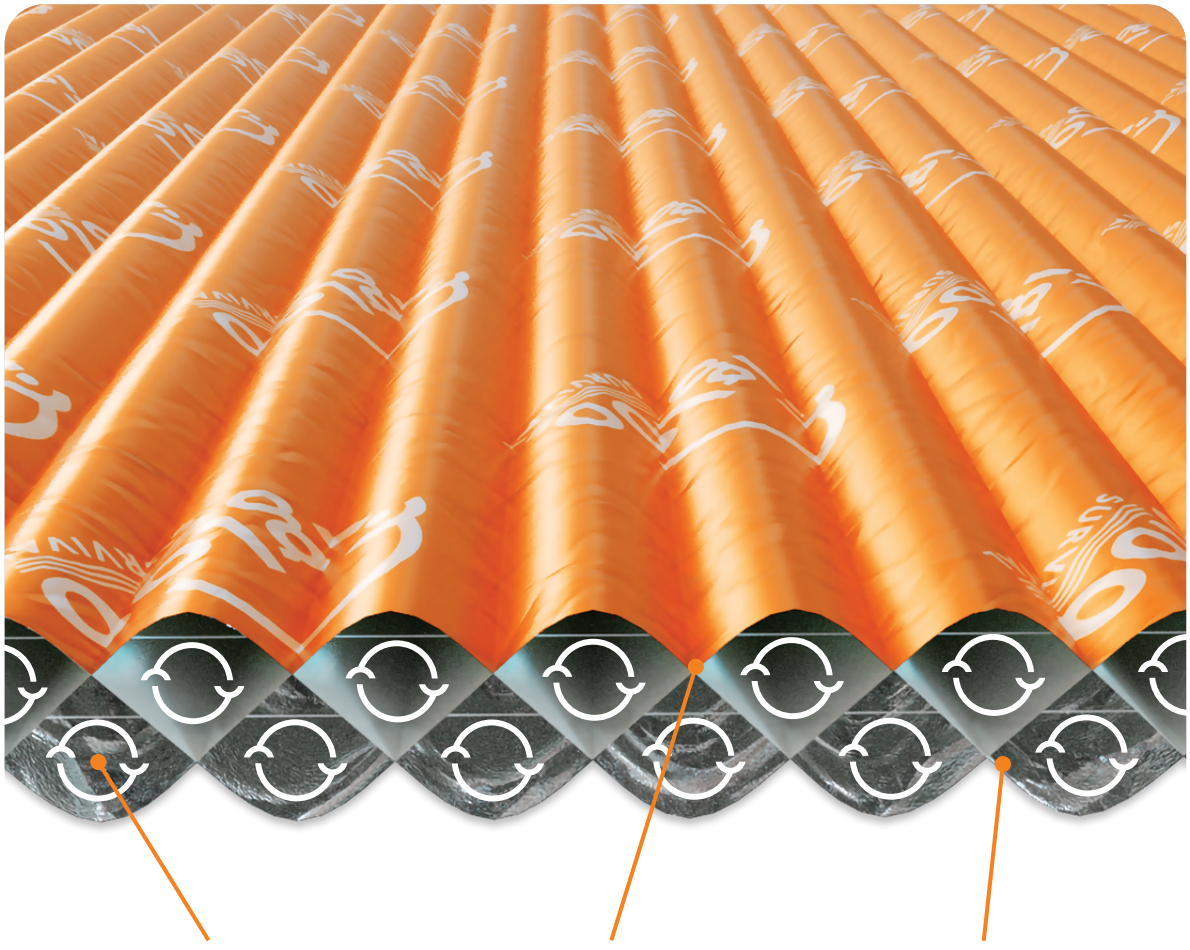

Why is the Igloo Blanket a survival essential?

1 Effective thermal stabilisation

Ultra-light, ultra effective: The Igloo Blanket excels in thermal retention and heat distribution, even under extreme conditions. This remarkable insulation capability is made possible by Igloo technology, an ultra-light fabric known for its exceptional ability to retain heat even under extreme conditions.

Minimising heat loss: The blanket features an innovative network of cells that capture warm air - allowing it to flow.

Reflecting the heat back: A reflective metallic layer directs heat back toward the user, enhancing insulation and locking in body heat.

2 Rapid deployment

In emergencies, every second counts. The Igloo Blanket unfolds quickly and effortlessly and starts to maintain body temperature in seconds. Due to its small space-saving pack, the Igloo Blanket is an essential for all first responders and disaster relief teams.

Igloo Blankets are not pressure packed and can be opened, inflated and deployed more rapidly as a result.

EASILY ADAPTS
TO USER'S SHAPE

COVER
PROTECT
SURVIVE

Body-hugging fit: The Igloo Blanket adapts to the user's shape, snugly wrapping them. Its cocooning effect means no gaps and no heat escape, but is adaptable if a looser fit is required.

Safe for all: The Igloo Blanket is latex free, ensuring compatibility with all patients and compliance with hospital entrance safety protocols.

Optimised heat distribution: The Igloo Blanket quickly circulates and maintains warmth evenly across the body.

Easy to seal and reopen.

3 Reliable thermal performance from incident to ER

Trauma management: Right from the scene of the incident, from prehospital to the operating theatre, the Igloo blanket maintains seamless life-saving heat - maximising survival outcomes.

Radiation and conduction minimisation: The technology reflects body heat back to the user, maintaining core temperature.

Locks in heat. From climbing accident to military medical extraction, the impermeable design shields against wind-chill, blocks evaporation and prevents heat loss whatever the environment.

igloo SURVIVAL

It's a wrap...

Compact, ultra-light, ultra effective.

Igloo is the final word in life-saving thermal retention.

What blanket should I use?

CORE 2 layer hypothermia blanket

A **2-layer blanket:**
Designed to maintain body heat.

IG010
IGLOO CORE 2-LAYER HYPOTHERMIA BLANKET
MEDIUM | Emergency Orange
2.3m x 1.5m | 5 TOG

IG009
IGLOO CORE 2-LAYER HYPOTHERMIA BLANKET
MEDIUM | Coyote Brown
2.3m x 1.5m | 5 TOG

IG012
IGLOO CORE HYPOTHERMIA BLANKET
SMALL | Emergency Orange
1.1m x 1.5m | 5 TOG

IG011
IGLOO CORE 2-LAYER HYPOTHERMIA BLANKET
SMALL | Coyote Brown
1.1m x 1.5m | 5 TOG

PRO

3 layer hypothermia blanket

A **3-layer blanket:** Designed to maintain body heat in scenarios involving critical, life-threatening, injuries and conditions.

IG004
IGLOO PRO 3-LAYER HYPOTHERMIA BLANKET
X LARGE | Emergency Orange
2.3m x 2.2m | 7 TOG

IG003
IGLOO PRO 3-LAYER HYPOTHERMIA BLANKET
X LARGE | Coyote Brown
2.3m x 2.2m | 7 TOG

IG002
IGLOO PRO 3-LAYER HYPOTHERMIA BLANKET
LARGE | Emergency Orange
2.3m x 2.0m | 7 TOG

IG001
IGLOO PRO 3-LAYER HYPOTHERMIA BLANKET
LARGE | Coyote Brown
2.3m x 2.0m | 7 TOG

IG008
IGLOO PRO 3-LAYER HYPOTHERMIA BLANKET
MEDIUM | Emergency Orange
2.3m x 1.5m | 7 TOG

IG007
IGLOO PRO 3-LAYER HYPOTHERMIA BLANKET
MEDIUM | Coyote Brown
2.3m x 1.5m | 7 TOG

IG015
IGLOO PRO 3-LAYER HYPOTHERMIA BLANKET
BABY | Emergency Orange
0.64m x 0.28m | 7 TOG

XTREME

3 layer **hypothermia blanket** + heat

A **3-layer blanket** with **heatpatches:**
Designed to maintain body heat in scenarios involving critical, life threatening, injuries and conditions.

IG006
IGLOO XTREME 3-LAYER HYPOTHERMIA BLANKET + HEATPATCHES
X LARGE | Emergency Orange
2.3m x 2.2m | 7 TOG

IG005
IGLOO XTREME 3-LAYER HYPOTHERMIA BLANKET + HEATPATCHES
X LARGE | Coyote Brown
2.3m x 2.2m | 7 TOG
